MH Engineering is a manufacturing company established in 2017 with a strong focus on quality and reliability. We design and build industrial machines that help businesses improve productivity and performance across various sectors.

With skilled professionals and modern manufacturing methods we deliver durable and efficient machines. Customer satisfaction continuous improvement and long term partnerships are the core values that drive our work every day.

Advanced industrial machine manufacturing

High quality industrial machine manufacturing
Trusted service support and customer focused solutions

OUR VISION / MISSION

STRONG MACHINES TRUSTED **PERFORMANCE**

Our expert team designs and manufactures durable and efficient industrial machines with strong construction smooth operation and reliable performance for different industries.

EXPLORE MORE

FRP Tank

Manufactured Using Our Advanced Filament Winding Machine Designed For Superior Strength Durability Dimensional Accuracy And Long Term Performance And Best Quality

Our Mission

To design and manufacture durable and efficient machines with a focus on quality timely delivery and customer satisfaction.

Our Vision

To become a trusted engineering company known for its reliable and high quality industrial machines.

WHAT WE DO

MANUFACTURING **STRONG AND RELIABLE** INDUSTRIAL MACHINES

Our expert team designs and manufactures high quality industrial machines for different industries. We focus on strong construction smooth performance and long lasting use to support our customers in their operations.

01

Machine Design and Manufacturing

We use modern technology quality materials and skilled workmanship to produce durable and efficient machines as per industry needs and customer requirements.

02

Maintenance and Support

We provide proper guidance service support and timely assistance to ensure smooth machine performance and long term reliability.

OUR PRODUCTS

We design and manufacture high quality industrial machines that deliver strong performance, long lasting durability and maximum efficiency for modern industries.

01

CNC 4-Axis Filament Winding Machine

Advanced CNC 4-axis control for high precision winding

Suitable for FRP tanks, pipes and composite products

High efficiency, stable performance and easy operation

02

INDUSTRIAL HOT AIR DRYING OVEN FOR PRESSURE TANK

Specialized in manufacturing a wide range of FRP tank machines

Strong construction and corrosion resistant design

Reliable performance with low maintenance

03

FRP TANK MANUFACTURED

Designed for safe and easy tank assembly

Strong and durable construction for heavy load

Smooth mobility and efficient operation

OUR PRODUCTS

High performance machines built with precision, strength and advanced technology for modern industries.

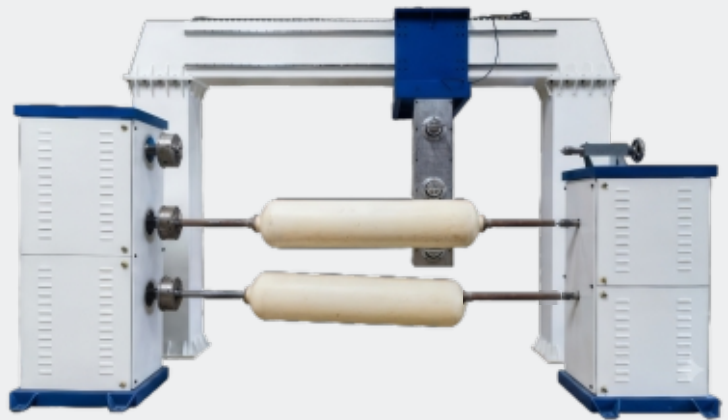

01 Pressure Tube winding Machine

-  Precision winding with automatic 8 operations in one process
-  Eliminates 3 manual steps for higher efficiency
-  Strong and durable structure for long lasting performance

02 Pressure Vessel Tank Winding Machine

-  CNC controlled for high precision winding
-  Suitable for RFP pressure tanks of various sizes
-  Stable performance, high efficiency and low maintenance

03 Cell Cutting and Length Adjustment Machine

-  Precision cutting and accurate length adjustment
-  Durable construction for long lasting performance
-  High efficiency operation with easy controls

OUR PRODUCTS

High performance machines engineered for strength, precision and reliability. Built with advanced technology to deliver excellent results for modern industries.

01

FRP Tank Assembly Trolley

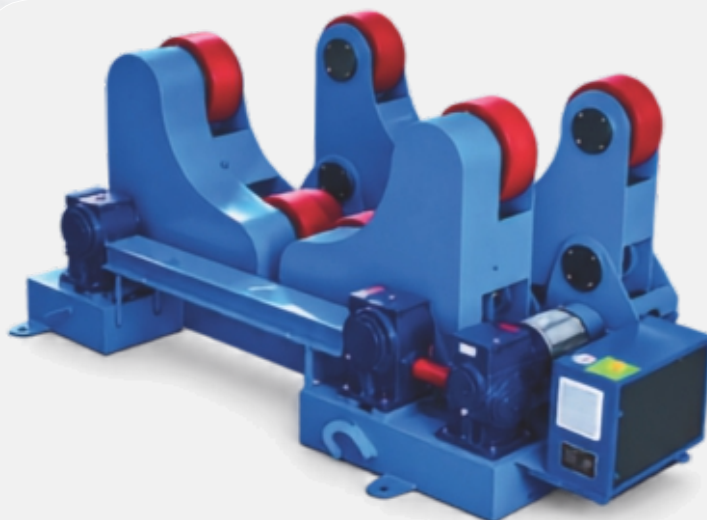

Strong and robust structure for heavy load handling

Smooth movement and easy operation

Reliable performance with high efficiency

02

Rib Cutter

High precision rib cutting for accurate finishing

Robust and durable construction

Compact design with easy operation

03

EOT Crane

High load capacity with smooth lifting

Strong structure for safe and reliable performance

Easy operation and low maintenance

OUR PRODUCTS

INNOVATING TODAY
BUILT FOR TOMORROW

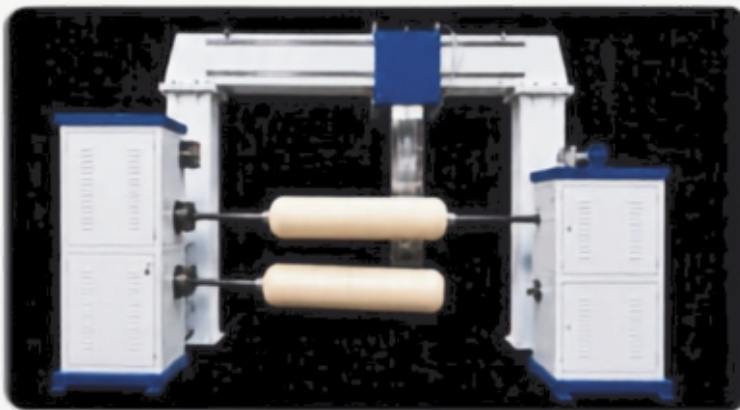

Engineered for precision. Built for performance. Our advanced machines ensure superior quality, efficiency and reliability in every step of FRP pressure tank manufacturing.

01

4 AXIS FILAMENT WINDING MACHINE

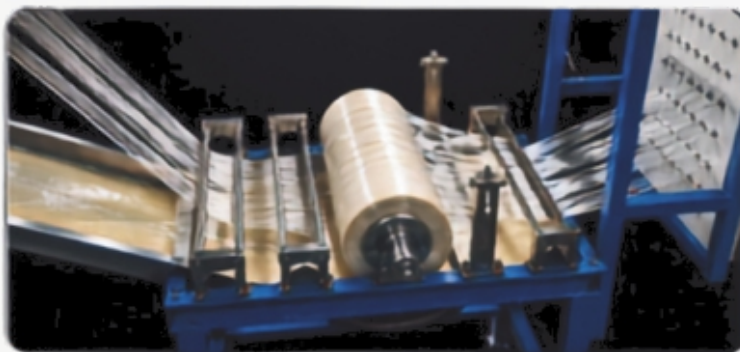

- ✓ CNC controlled 4-axis operation
- ✓ High precision winding for consistent quality
- ✓ Suitable for large diameter & long length tanks
- ✓ PLC based control system with HMI
- ✓ High efficiency, low maintenance design

02

PRESSURE VESSEL TANK WINDING MACHINE

- ✓ 3 Step winding process for strong tank build
- ✓ Uniform resin distribution for superior finish
- ✓ Adjustable speed & tension control
- ✓ Robust structure for heavy duty operation
- ✓ Ideal for FRP pressure tanks & vessels

03

RESIN BATH

- ✓ Ensures proper resin impregnation
- ✓ Corrosion resistant tank construction
- ✓ Adjustable resin level control
- ✓ Smooth fiber guiding for even coating
- ✓ Easy maintenance and cleaning
